Jiaxing Li

Ph.D. Candidate in Computing Science · Simon Fraser University · Vancouver, Canada

jla641@sfu.ca · jiaxingli-sfu.github.io · Google Scholar · LinkedIn

RESEARCH INTERESTS

LLM Applications, Cloud/Edge Computing, Distributed Systems

EDUCATION

Simon Fraser University, Vancouver, Canada — 2023.09 – Present
Ph.D. in Computing Science · GPA 4.29/4.33
Advisor: Prof. Jiangchuan Liu

Simon Fraser University, Vancouver, Canada — 2020.01 – 2023.08
B.Sc. in Computing Science · GPA 3.71/4.33

Fraser International College, Vancouver, Canada — 2018.09 – 2019.12
Transfer Program in Computing Science

PUBLICATIONS

Journal and Conference Papers

EXPERIENCE

Fortinet, Burnaby, Canada 2025.12 – Present
AI Researcher

- Designed and built, end to end, an AI agent that lets security engineers run FortiDeceptor, Fortinet's cyber-deception product that traps attackers with decoy systems, through plain-language conversation: it investigates attacks, plans defenses, and deploys them on live devices.
- Made its attack analysis trustworthy at scale: the agent examines tens of thousands of attack records, far more than a language model can read at once, and reports exact, verifiable numbers instead of hallucinated ones.
- Turned a single request into an autonomous defense: the agent maps the live network, designs tailored decoys, including ones that mimic the targets of a spreading attack, reviews and revises its own plan, and deploys only after a human signs off.

Jiangxing Intelligence, Shenzhen, China 2024.05 – 2024.08
Large Language Model Algorithm Intern

- Designed key components of AutoEdge, a system that automates the deployment and iterative fine-tuning of large language models on integrated edge–cloud platforms.
- Built an online learning method based on Bayesian optimization that picks the most cost-effective cloud GPU instances (spot or on-demand) for model training, balancing compute cost, engineering schedules, and model quality for significant operational savings.

4D LABS, Burnaby, Canada 2022.05 – 2023.05
Undergraduate Research Assistant

- Developed the Smart pH Reader Android app, which turns smartphone camera images into quantitative pH measurements through color analysis, with accuracy comparable to laboratory equipment.
- Validated the app in classroom experiments with more than 150 high school and undergraduate students; published as a first-author paper in the Journal of Chemical Education.

TEACHING

Teaching Assistant, Simon Fraser University

CMPT 454: Database Systems II Fall 2025
CMPT 365: Multimedia Systems Fall 2024
CMPT 371: Data Communications and Networking Fall 2023

Guest Lecturer (Co-Instructor), National Taiwan University of Science and Technology

Computer Networks (online course) Fall 2023

HONORS AND AWARDS

Best Paper Award, IEEE International Conference on Satellite Computing (for ITSVA) 2023
Graduate Fellowship, Simon Fraser University 2023, 2024, 2025
Ph.D. Research Scholarship, Simon Fraser University 2023, 2024, 2025
Undergraduate Open Scholarship, Simon Fraser University (Top 5% of students in the Faculty of Applied Sciences) 2022, 2023
VP Research Undergraduate Student Research Award (USRA), Simon Fraser University 2022
President's Honour Roll, Simon Fraser University 2022
Dean's Honour Roll, Simon Fraser University 2021, 2022

ACADEMIC SERVICE

Reviewer: IEEE INFOCOM 2025, 2026, 2027; ACM Multimedia (MM) 2025; The Web Conference (WWW) 2025

SKILLS

Expertise: Large language models, cloud/edge computing, distributed machine learning systems
Programming and tools: Python, Java, C++, SQL, Android development, Git, Docker, LaTeX

Last updated November 2026
